RE: NOTICE OF VIOLATION
SANTA FE UNIVERSITY OF ART AND DESIGN
EPA ID# NMD078353331

Dear Mr. Posey:

On May 21, 2018, the New Mexico Environment Department ("NMED") conducted a hazardous waste Compliance Evaluation Inspection ("Inspection") at the Santa Fe University of Art and Design ("SFUAD"), located at 1600 St. Michaels Drive, Santa Fe, NM, 87501. SFUAD was an arts college that offered students courses in painting, ceramics, photography, metalworking, woodworking, film, theater, and other fields of artistic study. SFUAD closed permanently following the Spring 2018 semester with the lease expiring on June 25th, 2018. The facility generates hazardous waste via wasting of oil based paints, various solvents, stains, degreasers, patinas, ceramics glazes, acids, bases, photography chemicals, various alcohols, and aerosols.

Based on that Inspection and review of the information obtained, NMED has determined that your facility is a Conditionally Exempt Small Quantity Generator of hazardous waste as defined in the Notification of Regulated Waste Activity Instructions (Environmental Protection Agency ("EPA") Form 8700-12); however, due to the removal of wastes associated with studio and work room cleanouts the generator status may change.

SFUAD has violated the New Mexico Hazardous Waste Management Regulations ("HWMR") (20.4.1 New Mexico Administrative Code) as specified below.

The NMED inspector observed the following violations:

1. Failure to make hazardous waste determinations on numerous containers in the metal working shop, woodworking shop, ceramics studio and stockroom, theater shop/work room and numerous studios/rooms in Marion Photographic Center, and Thaw Art Center. SFUAD does not currently have processes in place that utilize these chemicals. This is a violation of 20.4.1.300-NMAC, incorporating 40 CFR 262.11.

Corrective Action: SFUAD must make a hazardous waste determination on the above wastes either by testing or by knowledge of process and provide NMED with documentation identifying the wastes. NMED is also requesting complete inventories (including volumes) of chemical materials that are donated or sold to other businesses or organizations, in addition to hazardous waste disposal documentation.

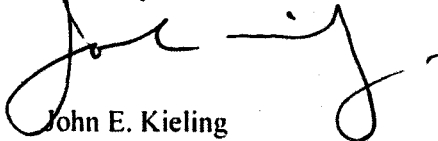

Please note: NMED has not yet adopted the new generator rules promulgated by EPA on May 30, 2017. Currently, 20.4.1 NMAC incorporates by reference the 2008 version of the Code of Federal Regulations, which is reflected in the citations included above.

NMED requires that SFUAD provide to NMED within thirty (30) days of receipt of this letter a written description of the actions taken by SFUAD to address the violations described above and a schedule for implementation of corrective actions not yet completed.

This Notice of Violation is considered an informal enforcement response in accordance with NMED's *Enforcement Response Protocol*. Please be aware that any future substantial deviations from regulatory requirements may result in your facility being considered for an elevated enforcement action. Also, be aware that any corrective action taken during our Inspection, or in response to this letter, does not relieve SFUAD of its obligation to comply with any and all other applicable laws and regulations.

If you have any questions regarding this letter, please contact Daniel Hermanns of my staff at (505) 476-6039 or by email at daniel.hermanns@state.nm.us. Please address any written response to the attention Mr. Hermanns at the address on the letterhead

Sincerely,

John E. Kieling
Chief
Hazardous Waste Bureau
