Subject: Amendment #1 to On-Call Construction Contract 23-0222

Vendor Name: GM Emulsion LLC

Munis Vendor Number: 3882

ITEM AND ISSUE:

Request for Approval of Amendment No. 1 to Construction Contract Item 23-0222 with GM Emulsion, LLC to Extend the Term through May 30, 2026, Update the Price List and Allow Contract Extensions for Up to Ten Years. (Romella Glorioso-Moss, Capital Projects Manager, rsglorioso-moss@santafenm.gov)

CONTRACT NUMBER:

The Munis contract number is 3204005.

BACKGROUND AND SUMMARY:

On May 14, 2023, the Governing Body approved on-call construction contracts with GM Emulsion, LLC and three other vendors. These on-call contracts are essential to efficiently deploy funds for pavement rehabilitation and roadway and trails construction projects.

This amendment adjusts the pricing on the contract as provided for in Article 2, paragraph D “Escalation/Reduction Clause” which allows the contractor, at the time of contract renewal, to adjust pricing not to exceed 10% annually. Based on the contractor’s request and verification by staff of increased costs for paving and concrete projects as published by NMDOT, prices will increase by 20%, cumulative for 2 years since contract establishment. The amendment also allows for adjusting pricing for changes in law such as tariffs that could affect costs.

Note that on-call contracts are not a guarantee of work and that task orders are issued as needs arise and funding is available. Staff requests quotes from multiple contractors for each project and Contractors may quote pricing that is lower than the contract price list.

This amendment also extends the contract through May 2026 and modifies the term to allow for extensions up to 10 years in accordance with NMSA 1978, Sections 13-1-150 through 152.

Dear Romella,

I hope this letter finds you well. As per Article 2, Subsection D – Compensation / Escalation/Reduction Clause, I am writing to bring to your attention the need for a price escalation concerning our line items on Contract #23-0222. Due to 20%-30% rising material costs and inflation over the last few years, we find it necessary to adjust our pricing structure in order to continue delivering the same high-quality products/services.

As such, we kindly request an adjustment of 20% per line item, effective with our contract amendment date. The 20% increase covers two years (last year and current year). We understand this may require review and consideration and all other terms of the contract will remain valid.

Should you have any questions or concerns, feel free to contact me at 505-471-9981.

Sincerely,

A handwritten signature in black ink, appearing to be 'G. Martinez', with a long horizontal line extending to the right.

CITY OF SANTA FE
CONSTRUCTION CONTRACT

THIS AGREEMENT is made and entered into by and between the City of Santa Fe, New Mexico, hereinafter referred to as the “City,” and **GM Emulsion, LLC.**, hereinafter referred to as the “Contractor,” and is effective as of the date set forth below upon which it is executed by the Parties.

RECITALS

WHEREAS, the City, through its Governing Body, is authorized to enter into a construction Contract for the project; and

WHEREAS, the City has let this Contract according to the established State and Local Purchasing procedures for contracts of the type and amount let; and

WHEREAS, construction of this Project was approved by the Governing Body of the City of Santa Fe at its meeting of _____, 2023.

The CITY and the CONTRACTOR agree:

1. Scope of Work.

The Contractor shall perform all the work required by the Contract Documents for On Call Roadway and Trails Construction Services (Bid # 23/48/B) as follows:

A. General:

The City of Santa Fe Public Works Department wishes to establish a City-wide Price Agreement for on-call roadways and trails construction services, which consists of, but is not limited to: construction of new pavement, multi-use trail sections, and related infrastructure such as storm water drainage, bicycle and pedestrian facilities throughout the City of Santa Fe.

The construction of this project will be in accordance with the New Mexico Department of Transportation Standard Specifications for Highway and Bridge Construction, 2019 Edition (NMDOT, SSHBC).

Public Works Department shall provide, at a minimum, a detailed scope of work and/or drawings, generally defining the roadway, storm water drainage, streets, trails, bicycle and pedestrian facilities, signage, and pavement markings required for the project.

The work to be performed shall consist of furnishing all tools, equipment, materials, supplies, and manufactured articles and furnishing all labor, transportation, and services, including fuel, power, water, and essential communications, and performing all work, or other operations required for the fulfillment of the Contract in strict accordance with the contract documents.

The work shall be complete, and all work, materials, and services not expressly indicated or called for in the contract documents which may be necessary for the complete, safe and proper construction of the work in good faith shall be provided by the awarded Contractor at no increase in cost to the City:

- Contractor must have sufficient experience in constructing this type of work and therefore is familiar with all combinations of materials, labor, and equipment that are required for the successful completion of this project.
- Contractors shall have the technical staff to perform diagnostic services and provide professionally prepared, stamped drawings, if needed, to obtain installation or construction permits.
- Contractor shall be responsible for adherence to the contract documents, specifications and approved directives and change orders.
- Contractor shall be responsible for verifications of all existing conditions, measurements and dimensions.
- Contractor shall be responsible for all permits, fees, and State and/or City inspections associated with the construction.

B. Specific:

1. Maintenance of Traffic

The Contractor shall furnish traffic control devices, take protective and safety measures, and complete the work. If the Contractor fails to do so, the Construction/Project Manager (The Construction/Project Manager will be listed on each Task Order) will notify the Contractor in writing of the deficiency and the Contractor shall take corrective action within the time frame specified by the Construction/Project Manager. Failure by the Contractor to take the corrective action as directed by the Construction/Project Manager shall result in the City assessing to the Contractor the incurred costs for the corrections plus an additional 10% for administrative costs.

The Contractor shall not endanger the traveling public when moving equipment on or across the Right of Way (ROW) and roadway. The Contractor's equipment shall enter and leave the ROW and roadway in the direction of the traveled way, except with the written approval of the Construction/Project Manager.

The Construction/Project Manager may direct the Contractor to maintain the pavement surface which the City will pay for.

The City is responsible for snow removal on sections of roadway open to the traveling public.

The Construction/Project Manager will coordinate snow removal with the Contractor and the City maintenance patrol.

The Contractor shall furnish warning devices, take protective and safety measures, and complete shoulder work, drainage structures, or other features of the work. If the Contractor fails to do so, the Construction/Project Manager will notify the Contractor in writing of the deficiency and the Contractor shall take corrective action within the time frame specified by the Construction/Project Manager.

The Contractor shall provide reasonable vehicular and pedestrian ingress and egress to adjoining properties during the duration of the Contract. The Contractor shall advise and schedule access modifications with local business owners and residences and the Construction/Project Manager at least 24 hours in advance.

The Contractor shall not open partially completed sections of the traveled way unless directed or approved by the Construction/Project Manager. If the traveled way is opened at the Contractor's request, the Contractor remains liable for costs associated with the opening until final acceptance of the project. The Construction/Project Manager will provide written instructions approving any sections which are to be opened. Such an opening shall not constitute a full or partial acceptance of the work or a waiver of any Contract provisions.

2. Rights in and use of Materials

The Contractor may use materials found in the excavation for completing pay items. Payment will be made for both the excavation of such materials at the corresponding contract unit price and for the pay item for which the excavated material is used.

If the excavated material would have been used to construct embankments or bridge approaches or for other purposes, any of which would have been required to complete the contract, the Contractor shall replace the excavated material with acceptable material at no additional cost to the City. The City will not charge the Contractor for the use of the excavated material. The Contractor shall obtain written authorization from the Construction/Project Manager before excavating material that is within the ROW but outside the grading limits, as shown by the slope and grade lines. Prior to granting approval, the Construction/Project Manager will verify that the requirements of Section 107, "Legal Relations, Environmental Requirements, and Responsibility to the Public" (NMDOT, SSHBC 2019 Edn.) have been met. If not previously cleared environmentally, meeting these requirements will be the responsibility of the Contractor.

Unless otherwise provided, the Contractor may temporarily use the material from existing structures in the erection of a new structure but shall not, without the approval of the Construction/Project Manager, cut or otherwise damage such materials.

3. Storage of Materials

The Contractor shall request from the Construction/Project Manager written approval to store

equipment or materials within the ROW for the adequate execution of the work. The Contractor shall store equipment and materials to preserve quality and fitness, to protect against vandalism or theft, and to facilitate inspection. The Contractor shall be responsible for the replacement or repair of materials affected by inadequate protection.

4. Final Clean Up

Pits located on state or federal land are governed by the appropriate requirements of the City. The requirements of this section do not apply to a commercial source.

Before final acceptance all areas occupied by the Contractor or in connection with the work shall be cleaned of all deleterious material, rubbish, excess materials, temporary structures and equipment, and all parts of the work shall be left in a condition acceptable to the Construction/Project Manager or otherwise required by the Contract. To avoid the requirement of removal of equipment from private property before final acceptance, the Contractor shall make appropriate arrangements with private property owners and provide documentation of the arrangement to the Construction/Project Manager.

The Contractor shall not allow borrow pits and surfacing pits to change the general pattern of existing drainage. Unless borrow pits or surfacing pits are suitable to develop as ponds or lakes and the property owner has notified the City in writing that such development is planned, the Contractor shall where practicable leave all pits well drained.

The Contractor shall, when excavation is complete, contour grade pits, except quarry pits, to blend with the natural topography of the surrounding area or in accordance with the Contract or agreements with the property owners.

5. Compliance with Plans and Specifications

The Contractor shall perform the work and provide the materials in substantial compliance with the lines, grades, cross sections, dimensions, and material requirements as specified by the Contract. The City's failure to discover or reject work or materials not in substantial compliance with the Contract during the work shall not be considered an acceptance of the work or materials, or a waiver of defects. The City's failure to properly perform inspections or tests shall not relieve the Contractor from its obligation to perform the work and provide materials in substantial compliance with the Contract and shall not be considered the City's acceptance of the work or materials.

If the Construction/Project Manager determines that work or materials are unacceptable, the Contractor shall remove, replace and correct the work or materials at no additional cost to the City. The Construction/Project Manager's determination that the work or materials are unacceptable shall not form the basis of a claim for additional contract time or additional compensation.

If work does not comply or substantially comply with the Contract, the Construction/Project Manager may determine the work is nonetheless acceptable. If accepted the

Construction/Project Manager will, by change order, provide an adjustment for work or materials.

6. Coordination with Utilities

The Contractor shall comply with the Notice to Contractors regarding cooperation with utilities for relocations, adjustments, and installations of utilities. The Contractor's responsibility is to adequately coordinate, notify, or comply with the Contract and failure to do so shall not form the basis for an extension of contract time or additional compensation.

The Contractor shall copy the Construction/Project Manager on all communications with utilities. For telephonic communications a summary of the communication shall be provided to the Construction/Project Manager monthly.

The Contractor shall be responsible for complying with the New Mexico Excavation Law, NMSA 1978, Section 62-14-1 through -10 (NMDOT, SSHBC 2019 Edn.), which provides the procedures and requirements related to the performance of project excavation work.

Failure by the utility owner to relocate, adjust, or install the utility in accordance with the Contract may result in the Construction/Project Manager issuing written direction to the Contractor directing that the Contractor shall relocate, adjust, or install the utility.

The Contractor shall terminate operations in the immediate area of a utility conflict not identified in the Contract and encountered during the work. The Contractor shall immediately provide written notice to the Construction/Project Manager of the conflict. The Contractor shall continue work in other areas. The Construction/Project Manager shall provide written notification to the Contractor when work may commence in the area of terminated operations. The Contractor shall make requests for additional contract time or compensation. Where utility conflicts not identified in the Contract are present, the Contractor shall provide the Construction/Project Manager, on a weekly basis, evidence of adequate coordination and cooperation with utilities. Neither additional contract time nor compensation will be provided where the Contractor fails to provide the Construction/Project Manager, on a weekly basis, evidence including a telephonic log of communications concerning the Contractor's continued cooperation and coordination activities with utilities.

7. Cooperation between Contractors

The City reserves the right at any time to contract for and have performed other work on or near the Project.

When separate contracts are let within the limits of any one project, each Contractor shall conduct the work without interfering or hindering the progress or completion of the work being performed by other Contractors. Contractors working on the same project shall cooperate with each other as directed.

Each Contractor involved shall assume all liability, financial or otherwise, in connection with

the Contract and shall protect and hold harmless the City for all damages or claims.

If the Contractor and one (1) or more other Contractors are unable to agree upon the sequence of work or other matters, the Contractor(s) shall request that the Construction/Project Manager provide a written decision on the issue. The Construction/Project Manager will allow a reasonable time for all parties to respond and, after reviewing the information received, will issue a decision binding on all parties within seven (7) days of receiving such information.

8. Inspection of Work

The Contractor shall provide the Construction/Project Manager with 48-hour notice for inspection of the work. Failure by the Contractor to provide the proper notice may result in the City directing the work performed without inspection to be removed at no cost to the City.

The Contractor shall provide the City access to the work and provide all information, equipment, and assistance requested or required to make a complete and detailed inspection of the work. All materials and each part or detail of the work shall be subject to inspection by the City.

The Construction/Project Manager may direct the Contractor to remove or uncover portions of the finished work, at any time before final acceptance of the work. The Contractor shall restore the portions of the work to the standard required by the Contract after the Construction/Project Manager's examination. If the examined work is acceptable, the City will pay for the removal and restoration as extra work. However, if the examined work is unacceptable, the Contractor shall remove and restore the work at no additional cost to the City.

Action or inaction by a City Inspector shall not relieve the Contractor from any responsibility under the Contract for acceptable work in conformity with the Contract. The failure to properly perform inspections, tests or approvals by the City shall not relieve the Contractor from its obligation to perform the work in strict conformance with the Contract.

9. Removal of Unacceptable and Unauthorized Work

Work that does not conform to the requirements of the Contract shall be unacceptable unless it is determined by the Construction/Project Manager to be acceptable. Should any defective work or material be discovered, before final acceptance, the City will issue a non-conformance.

Prior to City acceptance, the Contractor shall replace or repair materials damaged in transit or during handling at no additional cost to the City.

The Contractor shall remove unacceptable work resulting from causes existing before the final acceptance of the work and replace in an acceptable manner at no additional cost to the City. The Construction/Project Manager will set the time limit for the replacement work.

The City shall not pay for the following under the provisions of the Contract:
